

ENGINEERED EV CHARGING SOLUTIONS

CHARGER MANAGEMENT SYSTEM

Our platform uses Open Charge Point Protocol (OCPP) to connect to any OCPP-compliant charge stations.

HARDWARE-AGNOSTIC

- Gain flexibility and interoperability with OCPP.
- Different business cases require different charge point models. Scale your EV network by freely integrating charge points compliant with OCPP. DashCharger offers level 2 and level 3 commercial grade chargers.

AFFORDABLE & FLEXIBLE SOLUTIONS FOR VARIOUS APPLICATIONS

MURB: Residents can reimburse building management for electricity costs through a variety of payment options.

Commercial: Attract EV drivers to your property and generate revenue.

Fleet Management: Use smart chargers with our platform for monitoring and maintenance integration into broad EV networks.

LOAD MANAGEMENT FOR EACH CHARGER

Minimize the impact on electrical capacity. Automatically Limit power supply to each charger when needed using the Cloud Management System.

CREATE TAILORED EV CHARGING EXPERIENCES

DashCharger offers the most flexible, economic, and scalable infrastructure to meet your unique EV charging needs for communal applications such as condo visitor parking spots, public charging stations, or private charging stations.

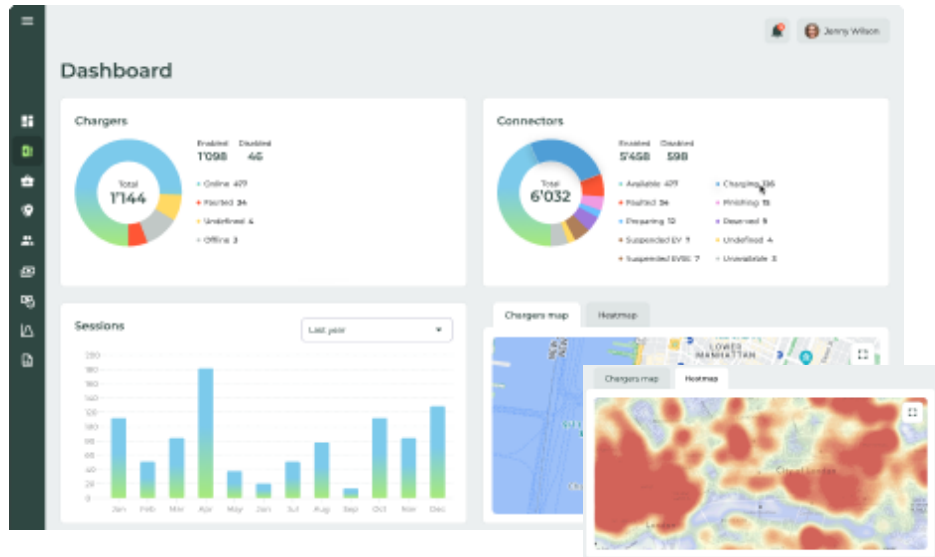

DASHCHARGER MANAGEMENT PLATFORM

Our OCPP Cloud Management Platform integrates multiple management features to provide a powerful and flexible solution for EV Charging Point Operators (CPOs) and building owners to work together.

PAYMENTS & BILLING

Build your own charging strategy and control the money flow. An automated billing system improves efficiency and reduces human error

- Accept payments directly from the end-users without additional fees or delays
- Automated receipt generation and billing
- Use credit card processors or pre-paid RFID cards

REMOTE MANAGEMENT & EFFICIENT MAINTENANCE

Improve Efficiency & Reduce Cost of Ownership

- Set up, customize, and manage your charging network remotely through a robust web portal
- Manage the entire EV charging network from your own desk. Set up, monitor, and maintain your chargers remotely. Reduce management time significantly.
